

# STEP Digital Families Learning App

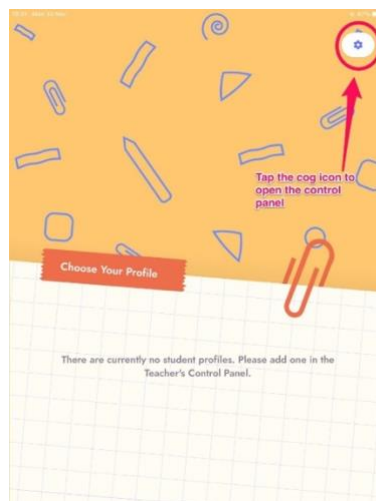

## Setting up your student's learner profile on the STEP Learning App

1. You must be with your student, have access to their iPad, and have their unique student ID number from your teacher dashboard when setting up their learner profile.
2. Install the STEP Learning App from the App Store onto your student's iPad.  
<https://apps.apple.com/us/app/step-learning-app/id1541179572>
3. Once installation is complete, open the STEP app on the iPad home screen.

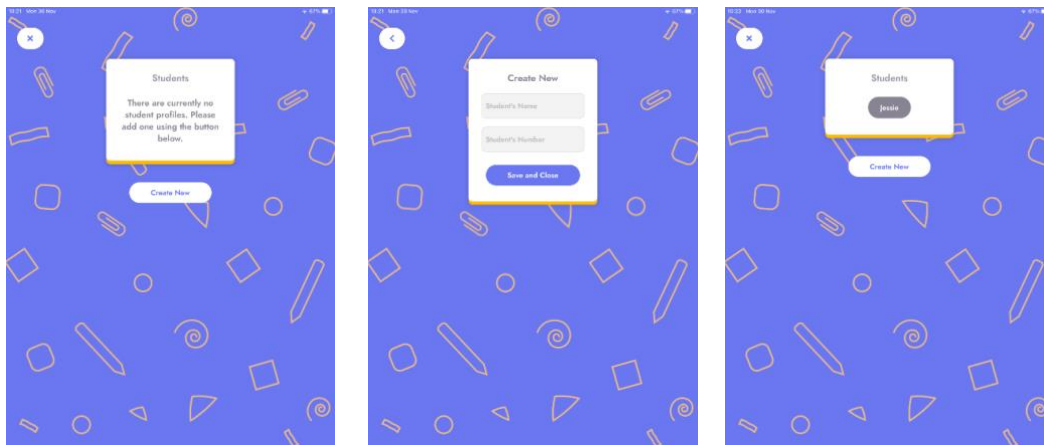

4. You will see the learning profiles area of the learning app. There are no profiles on it. Tap the cog icon to open the teacher control panel to add your student.

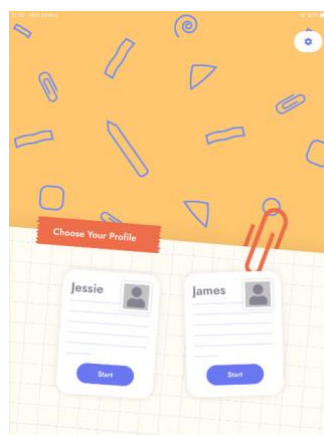

5. Enter the secure PIN received from STEP and tap the forward arrow.

6. Tap 'Create New'. This will bring up a new screen. Add your student's name and unique ID number. Tap 'Save and close'. If you need to add more students to this iPad, for example other siblings, tap 'Create New' and repeat the process.

7. You will now see the learner profile. Tap 'Start' to open the learner's profile.
