

STEP Digital Families Learning App

Getting started

There are 3 steps to follow in order for you and your pupil to use the STEP learning app.

1. Installing the app

The STEP learning app is free to download to iPad devices from [Apple App store](#).

2. Creating a teacher admin account

A teacher admin site has been created to support the STEP learning app. The admin area allows teachers to view their private teacher dashboard, create student profiles and communicate directly with students. Teachers must have a teacher admin account in order for them and their students to use the STEP learning app. Please contact STEP to be added to the teacher admin site.

3. Creating an active student learner profile

It is essential for teachers to create a learner profile in order for each of their pupils to access the STEP learning app through an active profile on their iPads. Teachers create these within their private dashboard. Teachers must then activate the profile on the student's iPad.

You will find detailed guidance on each step in our free downloadable pdfs.

If you have any questions about the teacher admin site or have problems activating your account once you receive the activation email, please do get in touch with step@ed.ac.uk.
