

# Activity 3: Footprints

## Looking & Seeing

- Find the animal footprints in your wee yellow sack.
- Think about who they might belong to and where they might live?
- Go for a walk and look for other animal footprints on the ground. Look at your own footprints. Are they bigger or smaller than animal footprints?

Use your magnifying glass to look closely – what can you see?

## Chatting & Wondering

- What clues can you get from animal footprints?
- Think about the shape, size and number of toes they have.

## Creating & Making

Find the Playdoh and animal footprint stones in your wee yellow sack. Now try making footprints in the Playdoh with your stone.

Is there anything else you could use to make footprints?
