

Activity 1: Insects

Looking & Seeing

- Find a toy bug in your wee yellow sack.
- Have a look at it. How many legs and eyes does it have? What colour is it?
- Go outside and find a real insect. Maybe look under a stone, a brick, a log or on flowers.
- Take a photo or draw a picture.

Use your magnifying glass to look closely – what can you see?

Chatting & Wondering

- Where do insects get their food?
- What is a butterfly before it becomes a butterfly?
- How many spots are on a ladybird?

Creating & Making

Use some of the materials in your wee yellow sack to make an insect.

Watch the videos on the STEP website to get some ideas.
